# LED PLAYER

Architectural, Entertainment & Stand Alone

DJs and Installations

User friendly

Mobile & Club

Architectural

Advanced profile editor with a library of 17.000 existing files for LED, moving head, laser or customized fixtures.

Play sequences, scenes and programs in live board and trigger them with mouse, keyboard keys, USB device, RS232, MIDI, DMX or with our **free app Wi-Light** and secure your project with a password.

Free worldwide assistance, technical support, updates, and software download.

Easy editor mode with Pan/Tilt and RGB colour effect generator.

Play your scenes and sequences in Stand Alone regarding light intensity, trigger, clock and calendar.

Review your show in real-time through the free 3D simulator software Studio DMX.

**100% safe software**, make sure your live performances will run perfectly without any failure.

10 YEAR ANNIVERSARY

DESIGNED & DEVELOPED IN FRANCE

LiveBoard playback window

Control your show in the liveboard with our free APP «Wi-Light» (Android + iOS) or use the interface triggers such as buttons, infrared, external contact, RS232, MIDI and DMX. Secure your project with a personal password, organize button orders and positions, add a background picture and push further your performance with a quick identification of your elements by buttons customization with name, size, colour and picture.

17 000 Profiles
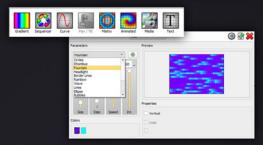

Create your own profile or select them from the 17 000 existing one and setup your patch graphically. All types of DMX patches are possible such as matrix or multiple universe configurations.

Easy Fixture Selection

Add a stage picture as background, setup your fixture positions in the preview area, then select easily the good profiles from the preview to manage and control efficiently your project.

Stand Alone & playback without computer use

Setup a Stand Alone show up to 64 universes using the Master/Slave options and define triggers like: buttons, infrared, dry contact, DMX-in, clock, calendar, RS232, light intensity, clock and calendar.

User Friendly

Quickly create various scenes, programs and sequences from the user-friendly effects generator like: gradient, sequencer, curve, pan/tilt, matrix, video, animated GIF and text.

Audio

Use the beat calculator (BPM) to play scenes and programs according to Beat of the music with Audio input and microphone.
